PROTECH®

ST-7 & ST-7J

The PROTECH ST-7/ST-7J shoulder mount adapters convert Sony EX1/EX3 and HVR-Z5/Z7 in to shoulder-mounted cameras, giving Balance and Stability

The Protech ST-7 & ST-7J both feature industry standard V-Mount battery plates allowing cameras to be powered using regular V-Mount batteries.

DC in & out 4-Pin XLR connectors enable a camera to be powered via an AC Adapter and an on-board camera light or other accessory can be powered directly from the ST7/ST-7J

With an integrated ST-1 tripod adapter plate the ST-7/ST-7J can be securely attached to a standard "full-sized" Tripod Plate (Sony VCT-14/VCT-U14 or Protech VST-14)

A side mounted array of 3 x BNC connectors gives the freedom to conveniently connect or remove cables.

Product Code	Camera Compatibility
ST-7	SONY EX1 / EX3
ST-7J	SONY HVR-Z5/Z7
